With Top **A** upside down and laid over a towel or cloth, to prevent scratching, insert Metal Frame **L** into notches.

**Note:** Touchscreen is the front and cords from Metal Frame **L** should be facing toward the back of the Top **A**.

**CAUTION:** DO NOT let Top fall over before securing screws in Metal Frame.

Secure underneath of Top **A** to Metal Frame **L** using Tool **I** to tighten two (2) Washers **N** and two (2) Screws **H**.
Then, secure Top A from inside the storage compartment to Metal Frame L using Tool I to tighten, two (2) Washers N and two (2) Screws H.

CAUTION: DO NOT let Top fall over before securing screws in Metal Frame.

Carefully insert Metal Frame R into Top A notches.
Repeat Steps 2 & 3 for Metal Frame R.

Stand up the AeroGarden Farm Top and Metal Frames.
Attach the two Base Metal Bars B at the bottom and in between Metal Frames L and R. Use Tool I to tighten four (4) Washers N and four (4) Screws H.

**Note:** You may need to pull frames closer in order to fit the bars. Hand tighten all screws on Top A and Metal Frames L and R, fully tighten after you finish installing the Base Metal Bars B.

Connect the Power Cords from Metal Frames L & R into the corresponding outlets inside Top A.
Move AeroGarden Farm to its final location before continuing.

Place Water Bowl D over Base Metal Bars B and place Grow Deck E over Water Bowl D (as shown above).

Make sure the 2 cords (pump and water indicator) coming from inside Water Bowl D are properly positioned out of the back side in the Water Bowl notches. Make sure the Grow Deck E is sitting securely over the long pump nozzle.
Now let’s connect the Power Cords coming from Metal Frame L with the Pump and Water Indicator cords coming from behind your Water Bowl. Match the endings of the Pump and Water indicator, to the corresponding power plugs. Position behind Water Bowl when done.
(1) With the LED Light C facing down and Power Plug facing out towards the Metal Frame L, remove rubber plugs from each top corner one at the time.

(2) Insert one of the small metal endings from the Light hanging cords into the small opening.

(3) Place the rubber plug back into its hole, holding hanging cord in place. (4) Repeat for all 4 holes.

**Remember**: The Power Plug needs to be facing toward your Left Frame “L”.
Plug your LED Light C into Top A using the Power Cord G provided. It connects from outside of the LED light to a plug underneath Top A.

Optional Trellis Installation Instructions:
Attach the magnetic hooks of the large Trellis cords to the INNER side of each of the posts of the Metal Frames of your AeroGarden Farm. Pinching the clips at the ends of the small Trellis cords, attach them to the long Trellis cords at any desired intervals.
Once all parts are in place, plug your AeroGarden Farm into a standard 110V-120V outlet and follow the instructions on the Touch Screen or your AeroGarden Farm’s Quick Planting Guide. You are now ready to plant!
Create a vertical ‘Wall of Growth’ with AeroGarden Farm 12s

Now grow all of your herbs and vegetables indoors—always homegrown ... fresh & safe!

All AeroGarden Farm 12 can be stacked to create a ‘Wall of Growth’ to produce food for your entire family.

Farm Stacking Kits (sold separately) are available at AeroGarden.com
