Included in Package

- Order extra Seed Pod Kits and Accessories at www.aerogarden.com

Important Safety Instructions

When using this AeroGarden electrical furnishing, basic precautions should always be followed, including the following:

1. Read all instructions before using this AeroGarden furnishing. SAVE THESE INSTRUCTIONS.

2. Do not use this appliance in any manner not explicitly described in these instructions.

3. Use this appliance only for the purpose described in these instructions.

4. Use appropriate voltage indicated on the base.

5. Do not allow children to play with this appliance.

6. Do not place this appliance on a soft surface such as a bed or couch.

7. Do not use this appliance near water or in damp areas.

8. Do not place this appliance in a location where it can be accidentally knocked over or knocked against.

9. Do not place this appliance in an area where it can be exposed to direct sunlight.

10. Do not place this appliance in an area where it can be exposed to direct wind.

11. Do not place this appliance in an area where it can be exposed to direct heat.

12. Do not place this appliance in an area where it can be exposed to direct cold.

13. Do not place this appliance in an area where it can be exposed to direct water.

14. Do not place this appliance in an area where it can be exposed to direct oxygen.

15. Do not place this appliance in an area where it can be exposed to direct smoke.

16. Do not place this appliance in an area where it can be exposed to direct carbon monoxide.

17. Do not place this appliance in an area where it can be exposed to direct carbon dioxide.

18. Do not place this appliance in an area where it can be exposed to direct carbon tetrachloride.

19. Do not place this appliance in an area where it can be exposed to direct ethylene.

20. Do not place this appliance in an area where it can be exposed to direct hydrogen.

21. Do not place this appliance in an area where it can be exposed to direct methane.

22. Do not place this appliance in an area where it can be exposed to direct ammonia.

23. Do not place this appliance in an area where it can be exposed to direct nitrogen.

24. Do not place this appliance in an area where it can be exposed to direct oxygen.

25. Do not place this appliance in an area where it can be exposed to direct argon.

26. Do not place this appliance in an area where it can be exposed to direct neon.

27. Do not place this appliance in an area where it can be exposed to direct helium.

28. Do not place this appliance in an area where it can be exposed to direct hydrogen.

29. Do not place this appliance in an area where it can be exposed to direct carbon.

30. Do not place this appliance in an area where it can be exposed to direct sulfur.

31. Do not place this appliance in an area where it can be exposed to direct phosphorus.

32. Do not place this appliance in an area where it can be exposed to direct arsenic.

33. Do not place this appliance in an area where it can be exposed to direct antimony.

34. Do not place this appliance in an area where it can be exposed to direct bismuth.

35. Do not place this appliance in an area where it can be exposed to direct thallium.

36. Do not place this appliance in an area where it can be exposed to direct lead.

37. Do not place this appliance in an area where it can be exposed to direct mercury.

38. Do not place this appliance in an area where it can be exposed to direct cadmium.

39. Do not place this appliance in an area where it can be exposed to direct selenium.

40. Do not place this appliance in an area where it can be exposed to direct tellurium.

41. Do not place this appliance in an area where it can be exposed to direct polonium.

42. Do not place this appliance in an area where it can be exposed to direct radon.

43. Do not place this appliance in an area where it can be exposed to direct actinium.

44. Do not place this appliance in an area where it can be exposed to direct thorium.

45. Do not place this appliance in an area where it can be exposed to direct protactinium.

46. Do not place this appliance in an area where it can be exposed to direct uranium.

47. Do not place this appliance in an area where it can be exposed to direct neptunium.

48. Do not place this appliance in an area where it can be exposed to direct plutonium.

49. Do not place this appliance in an area where it can be exposed to direct americium.

50. Do not place this appliance in an area where it can be exposed to direct curium.

51. Do not place this appliance in an area where it can be exposed to direct berkelium.

52. Do not place this appliance in an area where it can be exposed to direct californium.

53. Do not place this appliance in an area where it can be exposed to direct einsteinium.

54. Do not place this appliance in an area where it can be exposed to direct fermium.

55. Do not place this appliance in an area where it can be exposed to direct mendelevium.

56. Do not place this appliance in an area where it can be exposed to direct nobelium.

57. Do not place this appliance in an area where it can be exposed to direct laws.</p>
**Gardening Tips for Maximum Harvests**

**PLANTING**
- Many Seed Pods are labeled for height. Gardens grow and look their best when plants are tall in the back, medium in the middle, and short in the front and sides. If all plants are the same size, like growing neighbors, and eventually can actually block enough light to stunt the garden, but never take more than 1/3 of each individual plant at a time.
- Use well water which may interfere with our nutrients, or softened water.
- Do not immerse cord in water or other liquid, and unplug cord from outlet when not in use.
- Fill Bowl up to FILL LEVEL – Med or Tall
- Do not use softened water as it contains too much sodium and will usually harm your plants.
- Do not plug in unit with open openings, and short plants are in front openings (see diagram).
- Do not do much nutrient can hurt your plants.
- For Salad Greens, cut the top 2 inches off the entire garden, or harvesting. Some plants may benefit from multiple harvests throughout the growing season.

**GROW DECKS**
- A spouted container is recommended for use with the AeroGarden. The spout eliminates the need to pinch off the top of the plant, which can be difficult to do with certain varieties.
- Not pruning is the number one reason your garden will not grow.
- Prune often to maintain a healthy bush, and produce big yields.
- Pruning also releases a wonderful sandwich. And, a full, bushy garden will make for a beautiful garden.
- Pruning should be done whenever the plant is actively growing and should be done late, at the end of the growing season.
- Prune to a beautiful garden.
- Do not do much nutrient can hurt your plants.
- Do not use softened water as it contains too much sodium and will usually harm your plants.
- Do not plug in unit with open openings, and short plants are in front openings (see diagram).
- Insert Seed Pod into openings in Grow Deck.
- Grow Dome seed variety and pod size not to replace into place. It is not necessary for Grow Domes to cover any Plant Spaces in your Aerogarden. Remove Labels from Seed Pods until plants have sprouted and their leaves nearly touch the domes.
- The Nutrients icon shows how many days are left to add nutrients. Simply empty all water from the bowl, add all nutrients recommended for your plant, and then allow the lights to run their normal cycle.
- The Light icon shows the current time as well as whether the grow light is scheduled to turn on or off each day.

**LUMINOSITY**
- The Nutrients icon shows how many days are left until the next nutrient addition is scheduled for your plant.
- The Water icon reminds you when it is time to add water, and will turn red if you forget to do so.
- Add Nutrients – Allows you to customize or reset your nutrient addition alert to start at a time every 14 days to remind you to add nutrients, but can be changed if your plants have other nutrient requirements. This would not be necessary in normal use.
- Pump – Allows you to customize or reset your Pump settings and also to test the pump.
- Quick Plant – With just a few touches, Quick Plant helps you select the settings you need for the type of plant you are growing.

**FULL BREAKDOWN**
- Water 
  - FILL LEVEL
  - FILL LEVEL

**POLLENATING**
- Because most people don’t have bees in their home, you will need to start pollenating your tomatoes and peppers. 
  - Use the “set Pollenating” option on the control panel for 6-8 hours your grow lights turn on per day.
  - If you have any questions please feel free to contact our customer service representatives at 1-800-476-9669 (USA) or 1-800-611-9058 (Canada) at facebook.com/aerogarden. “Like” us for special offers and community fun!

**LIMITED WARRANTY**

**USER MAINTENANCE**
- Any servicing is to be performed by an authorized service representative.
- If you have questions or concerns regarding your AeroGarden, please contact Customer Service at 1-800-476-9669. Please do not return products if the serial number has been removed or defaced; products subject to negligence, accident, improper use, maintenance or storage; products damaged by use in industrial or commercial applications; products that have had their serial numbers altered; or products that have been altered or modified in any way.

**USE OF PLUG TO WIDE SLOT, FULLY INSERT.**
- CAUTION! The plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.
