Welcome to the world of indoor gardening!

2 Easy Steps
To Get Your AeroGarden Up and Growing

1. Set Bowl into Base

   - Check to be sure that Bowl is securely seated in Base and that Grow Deck is properly aligned on Bowl.

2. Plug Pump Power Cord into Base

   - Check to make sure that Pump power cord is plugged into the connector at the back of the base.

How to Raise and Lower the Light Hood

To raise and lower the Light Hood, wrap one hand around the bottom of the Light Post just above the Grow Deck. Grasp the upper part of the Light Post with your other hand and push up or raise the Light Hood or push down to lower the Light Hood. The Light Post will move up or down several notches at a time with a little pressure, or you can move it up or down several notches at a time with more pressure.

When planting a new Seed Pod Kit, the Light Hood should be set to the lowest possible position. For instructions and tips about when to raise (or not to raise) the Light Hood, refer to Gardening Tips (on flip side) and/or Seed Pod Kit Instruction booklet included with each seed kit.

Congratulations!
Your garden is ready to grow.
It really is that easy!

About The Pump

The Pump in your Harvest Garden will automatically run 5 minutes every hour. You do not need to set any controls to activate the pump. To test the pump, Press and Hold 'Select' for 2 seconds. When the pump starts, you will hear the water trickling into the Grow Bowl. You can also lift the Grow Deck to see the water pumping upward. The Pump will run in the test mode, then automatically shut off.

An Important Note About Lights

Your AeroGarden has a built-in timer for the Grow Light that automatically provides your plants with “sunlight” (16: 18 hours per day). Acting as a substitute for natural light and energy, the Grow Light helps your plants grow strong and healthy. Many people find it most convenient to have the lights on in the morning or afternoon when there’s most potential to work and stay comfortable.

How to Personalize Your Light Timer (Optional)

When you plug in your AeroGarden for the first time the Grow Light will come on, and will continue to come on at the same time every day. If you are satisfied with the light timer you do not need to make any changes. If you would like to change the time of day when the lights come on, follow this simple step:

At the time of day you want the Grow Lights to come on:

• Use the ‘Lights’ button to turn lights ON if they are not already on. Grow Lights must be ON to reset the light timer.
• Press and Hold the ‘Lights’ button for 3-5 seconds until control panel lights blink, then release.
• Your Grow Lights will now come on at this time each day, and will stay on for the number of hours you have chosen on the control.

PRUNING

• Many Seed Pods are labeled for height. Gardeners grow and look their best when tall plants in a back and medium/short plants in the front and border. If all plants are the same size, like Salad Greens, they can be planted anywhere.
• Do not remove Labels from Seed Pods. The labels identify the plant type and plant height, show the germination time, and inhibit algae growth.

GARDENING TIPS FOR MAXIMUM HARVESTS

• Plants grown in the AeroGarden are designed to thrive with municipal tap water. If your water is especially hard, softened water, or softened water, as it contains levels of nutrients, or softened water, as it contains levels of

LUCKY SEEDS

• Add nutrient directly into Bowl when first planting
• Add nutrient directly into the Bowl.
• Follow instructions for feeding amounts printed on the nutrient

REMEMBER TO WATER!!

• Water growing plants in your garden get

U.S. CAUTION: – You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

User Maintenance: – Any servicing is to be performed by an authorized service representative. Use original packaging for storage when the appliance is not used.

DO NOT SUBMERGE – Household use only

To reduce the risk of electric shock, this furnishings has a polarized plug (one blade is wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.
